*General NEC meetings are held at 7:00 PM and BOG meetings are held at 7:30 PM (unless otherwise noted)*

The NEC does not coordinate dates for club events, but does publish this monthly calendar for your convenience. Prior to selecting a date for your club’s next event, please check the NEC calendar for availability, and then notify me of the new date immediately at BRomeo1234@optonline.net or by phone @ 914-433-2556. The NEC advertises for NEC clubs and National/International Organizations in the NEC calendar.
Next General NEC Meetings Time Change

Calling all NEC delegates! The 3rd Quarter General NEC Conference Call is approaching fast on Sunday, September 22nd. The time has been set for 7 PM. Conference call information is: (712) 451-1055 (916159#). Contact Russ if you would like to add a topic to the agenda by Saturday, September 21st.

Join NEC at Aquatic Experience!

Aquatic Experience is being again at the Meadowlands Exposition Center in Secaucus, New Jersey during Columbus Day weekend (Oct 13-14). Come say hello to the NEC and other NEC member organizations. If you would like the NEC to give out flyers for your club or event during the Aquatic Experience, please contact Barbara Romeo at mailto:BRomeo1234@optonline.net.

In addition, Barbara is looking for booth volunteers for a couple of hours at a time so all volunteers have the opportunity to more fully experience the event. Contact Barbara if you can volunteer at mailto:BRomeo1234@optonline.net.

See flyer on the next page for more information or go to their website at https://aquaticexperience.org/
Take your passion for underwater life to new depths.

As North America’s premier saltwater and freshwater trade show designed for hobbyists of all levels and interests, Aquatic Experience is your exclusive opportunity to:

- **Explore** 61,000+ square feet of salt and freshwater exhibits and fish displays;
- **Discover** the latest products for aquatic life all kinds;
- **Enter aquatic competitions** and raffle drawings for valuable prizes;
- **Interact with other hobbyists** who are passionate about aquatic life;
- **Meet your favorite** aquatic social media personalities;
- **Soak-up ideas** from educational seminars and demonstrations presented by well-known speakers, plus attend a FISH HEALTH MANAGEMENT COURSE;
- **Cichlid Show** with Cash Prizes, $500 Best of Show.

**October 12-13, 2019 | Secaucus, NJ | Meadowlands Exposition Center**

Buy tickets at aquaticexperience.org
Welcome Skylands Aquarium & Water Garden Group (SAGG) to the NEC!

Skylands Aquarium & Water Garden Group (SAWGG) was formed for hobbyists in Northwest New Jersey (Morris, Warren, Sussex, Western Passaic County) and surrounding towns.

If the keeping, cultivation, or conservation of aquatic life interests you, and you want to meet local hobbyists in a friendly environment to learn new things, share ideas, and acquire new species, stop by one of our monthly club meetings in Denville (Morris County).

SAWGG is the 36th organization in the NEC!

Check out the group at sawgg.org.
NEC Convention Update

Even though the next NEC Convention is more than 6 months away, we are working diligently to ensure its’ another exceptional convention. The Convention Chair, in the hopes of bringing new individuals (and ideas) into the convention preparation, has broken up a number of tasks and responsibilities into “individual jobs” which are very easily doable if one has a couple of hours a week /month to volunteer. They are as follows:

1. Preparing convention nametags
2. Preparing registration packets including meal and clothing tickets
3. Help edit the convention booklet with Gary Wong. Work with NEC member organizations to prepare their ads for the booklet.
4. Facilitate the printing and delivery of the convention booklet with the Printer
5. Purchase convention buttons and pens for registration envelopes
6. Facilitate the speaker biographies for the website and registration packet with the speakers, gather speaker photos for the convention booklet and publicity. Facilitate all speaker airport pick-ups (as necessary), etc.
7. Help Registration Chair, Cheri Tenaglia at the registration table before and during the convention.
8. Creating videos and flyers for social media advertising.
9. Create and organize Saturday banquet decorations
10. Create bulletin boards – meeting schedule, banquet table seating, etc.
11. Help coordinate videotaping of speaker programs
12. Help creation DVDs of speaker programs for lending library

Every little bit helps! Please contact Leslie if you are interesting or have questions about any of the above “jobs” ASAP at mailto:necconventionchair@gmail.com. Thank you

NEC Slide and Videos

All video and slide presentations are available to any NEC club to use as their monthly meeting program. Any other use should be discussed with the NEC slide and video chairman prior to the request. Please make requests as far in advance as possible to allow for scheduling and regular mail delivery.

The NEC will pay for standard postage to the requesting NEC club. Any NEC club requesting expedited delivery will need to pay for that postage. The NEC club requesting the program is responsible for postage back. Failure to return the program will result in a $50 replacement charge. Please return programs within 14 days after the scheduled meeting.

Requests should be made to: David Banks, 315 US RT 2, Grand Isle, VT 05458, Email: dbanks@together.net or 802-372-8716

Last published library listing: January 15, 2018 NEC Newsletter and on the NEC website: http://northeastcouncil.org/basic-page/nec-lending-library

NEC Articles Competition Winner Entry Reprint

2016 Junior Class Article – 2nd Place Winner “Growth Study Focused on Lepomis cyanellus” by Dalton Stoner

Our next reprint won 2nd place in the Junior category in 2016 by Dalton Stoner. It was published within Aquarium Club of Lancaster County (ACLC) ’s May 2016 publication Tank Tales.
Growth Study Focused on *Lepomis cyanellus*

By Dalton Stoner, 16, North Carroll High School

The Stoner and Stiles study of Spring 2014 was a growth study focused on *Lepomis cyanellus*. The goal of the study was to test the effect of different types of lights on the growth of *L. cyanellus*.

Two tanks were set up. They were each 10 gallon tanks. Initially 3 fish were put in each of the tanks. A lamp was placed over each tank, one with a black light or ultraviolet bulb, the other with a normal incandescent light bulb. During the study one of the fish in the incandescent light tank jumped out of the tank and died. Because of this, screens were placed over the tops of each of the tanks. To avoid any other light affecting the ultraviolet light tank's results, mirrors were placed all around the tank to block as much of the daylight that it would have been exposed to.

The fish were anesthetized and measured for weight and length each week. They were also monitored for anything unusual on their bodies. Water quality data was taken once each week and recorded. The water in the tanks was changed once a week and also once each week the tanks were topped off with water because of evaporation. During the study the water quality started to deteriorate, creating excess nitrates which is harmful to the fish. Therefore plants were added into the filters of each tank by planting them in gutter mesh and putting them in the filters. The purpose of this was to reduce the amount of nitrates because plants consume nitrates and thrive in higher nitrate levels. The hope was to reduce the amount of nitrates to safe levels for the fish to thrive and survive. After these plants were added to the filters the amount of nitrates dropped significantly.

After two weeks of the study the lights on the tanks were switched to see if the ultraviolet light affected the growth of biofilms. The mirrors were also switched to the other tank to attempt to prevent other types of light entering the tank. The study showed that the biofilms that had previously grown in the incandescent light tank, when switched with ultraviolet light soon disappeared. In the ultraviolet light tank no biofilms had grown but when the lights were switched biofilms began to grow. This led to the conclusion that ultraviolet light can lead to the death of biofilms.

The study also concluded that there was no change in the growth of *L. cyanellus* due to the different types of lights that they were exposed to. The growths of the fish in each tank were very similar and showed no significant difference. Notably however, there seemed to be strange growths near the gills of the fish that were exposed to ultraviolet light. This growth could not be proven to be caused by the exposure to ultraviolet light. The fish in this tank were also paler in color than the fish in the incandescent light tank. The growths seemed to disappear and the color returned to the fish after the lights were switched between the tanks.
Koi Organisation International

We can help!

Learn Online

www.KoiOrganisationInternational.org
Welcome back! We hope you had a great summer. This month, we’re holding a special “Ask the Experts” session. We have assembled a panel with expertise on:

- Plants
- Guppies
- Live foods
- Angelfish
- Marine fish

And just about anything else. Come with questions, and ask away! We will also be holding our usual auction and raffles. See you soon.

LIAS Meetings are held at SUNY Stony Brook’s Maritime Science area. Room 120 in Endeavor Hall on the State University at Stony Brook Campus, Stony Brook, NY 11794.
